

[Czech]: MN-63-05 Insulated knives for electricians**[Czech]: Professional knives for electricians****Vlastnosti a výhody**

- [Czech]: The fully insulated blade protects the user from electric shock
- [Czech]: The profiled two-component handle provides a comfortable grip and knife operation
- [Czech]: The protective hood for the blade protects them against damage during transport and protects the user against injury
- [Czech]: Certified VDE insulation confirms that the knives have been tested in a laboratory accredited by the German VDE testing institute and meet the requirements of EN 60900: 2018
- [Czech]: The precision-made stainless steel blades enable low-power cutting
- [Czech]: Improved ergonomics thanks to the handle with a comfortable collar to prevent the hand from slipping
- [Czech]: The hook foot at the end of the hook blade allows the wires to be stripped from the outer sheath without damaging the wires
- [Czech]: The additional front blade allows the cables to be cut in two directions
