# R-S1-PEA EPDM B/WASHER

Special shape of the washer ensures proper placement of the EPDM sealing material to substrate

## **PACKAGING**

#### FEATURES AND BENEFITS >

Each packaging features two highly functional solutions: the Ziploc type re-sealable zipper and the sturdy upper packaging section. This allows for the bag to be opened and closed multiple times, provides for secure storage of products for a long time, and facilitates display by preventing the bag from folding.

Depending on the product type, and its weight in particular, the Rawlbag comes in two standard thickness versions. All this to ensure durability and strength of our packaging in transport, the highest quality of product display, and ultimately also long-lasting storage.

The bags are made entirely of low-density polyethylene, which makes them suitable for recycling and reduces the related purchase costs

# **PRODUCT**

#### FEATURES AND BENEFITS >

Self vulcanizing EPDM washer.

Temperature and UV resistant.

The special shape of the washer ensures proper seating of the sealing material on the outer cladding material fixture which guarantees a proper seal.

Temperature range from -50C to +100C

Self vulcanizing EPDM washer.
