

RT-HSSC HSS Cobalt drill bits

Cobalt HSS drill bits for a precise drilling in stainless steel

Certificate

Product information

Features and benefits

- Drill bits made of high-quality HSS M35 steel, which contains 5% of cobalt, enhancing hardness, heat resistance, which increases their durability and life time
- Cobalt content allows you to drill in stainless steel and hard steel
- Ground spiral enables you to drill precisely
- Double-sided geometry of the point (SPLIT POINT) ensures ideal centring and reduces pressure while drilling
- Point angle of 135° enables you to drill in hard steel
- Manufactured to DIN 338 standard, which ensures constant parameters and sizes of the drill bits

Applications

- Drilling holes in stainless steel and steel with higher hardness

Base materials

- Stainless Steel
- Structural Steel
- Metal Sheet & Profiles
- Non-ferrous metals
