

RT-FDI Zirconium flap discs for grinding stainless steel

Zirconium flap discs for grinding steel and stainless steel

Certificate
EAC

Product information

Features and benefits

- High quality, European, zirconium grain allows grinding stainless steel
- High concentration of evenly spread flaps enhances durability and affects the quality of the material that is being finished
- High-quality adhesive that holds the flaps increases the flap disc durability
- Diverse grit size of the paper allows you to grind the surface precisely
- Designed to work without the need to cool them with water
- The internal bore of 22,23 mm allows for use with all angle grinders available on the market
- Manufacture in Poland guarantees high quality

Applications

- Designed for grinding stainless steel

Base materials

- Stainless Steel
- Structural Steel
