

MN-68-97 Flat grinding wheels for cutting steel

High-quality aluminum oxide ensures long life, speed and precision of cutting

Features & benefits

- High-quality aluminium oxide provides long service life of the product
- The thin cross-section of the blade enables faster and more accurate cutting and a narrow kerf
- Bakelite bond, reinforced with a mesh, increases disc strength at high revolutions
- Abrasive grain size 46 assures high quality and precision of cutting
- Disc hardness S (semi-hard) increases durability and cutting speed

Applications

- For cutting steel and alloy steel
- Intended for using with angle grinders

Users

- Locksmiths
- Tinmen
- Reinforcers
- Welders
- Mechanics

Technical properties

Index	Outer diameter of the disc	Internal diameter of the disc	Thickness of the flat disc	Box	Outer	Box weight	Outer weight	EAN
