

MN-72-580 Telescopic rod

Light and durable rod with smooth length adjustment

Features & benefits

- Two attachment end pieces – threaded and press-in, enabling the rod with the adapter to be attached to the spatula.
- Aluminium and glass fibre ensuring high mechanical strength and long service life of the rod while maintaining its low weight.
- Rubberised handle providing secure and comfortable grip.
- Rod diameter of 32 mm ensuring high strength and rigidity.
- Easy and smooth rod length adjustment allowing quick adaptation to the type and place of work.
- Firm high-precision telescope locking mechanism providing secure grip while working.

Applications

- Designed for wall and ceiling finishing work.

Users

- Gypsum plasterers
- Painters
- DIY enthusiasts
- Tilers
- Bricklayers

Corresponding products

- MN-72-581 Adapter for skimming spatula
