

MN-72-581 Adapter for skimming spatula

Strong adapter with angle adjustment and universal mounting socket

Features & benefits

- The joint of the adapter with a serrated lock guarantees that the putty angle is maintained.
- The clamping screw allows you to easily adjust the tilt of the putty in relation to the telescopic stick.
- Two adapter levers facilitate quick removal from the putty.
- The precise and strong jaw chuck adheres perfectly to the profile of the putty and guarantees a firm hold.
- Made of high-strength plastic, it ensures a stable connection and a long service life.
- Adjusting the tilt angle from 90° to 180° allows for individual adjustment of the tilt of the putty, increasing the comfort of work.
- Two types of mounting socket - threaded and pressed.

Applications

- For joining skimming spatula with a telescopic handle.

Users

- Gypsum plasterers
- Painters
- DIY enthusiasts
- Tilers
- Bricklayers
