

RT-HAM Locksmiths' Hammers

Locksmiths' hammers with a round wedge and a rubber cover for the handle

Certificate

Product information

Features and benefits

- Hard and flexible handle made of ash wood.
- The lacquered coating of the handle protects it from the weather.
- Head made of forged steel, induction hardened guarantees its durability
- Hammer handle is additionally protected by a rubber cover near the hammer head, which protects against physical damage of the handle
- The use of a round wedge shape ensures secure fixing of the handle to the hammer head.
- The handle profile and painted handle ensure a secure grip and comfortable working conditions

Applications

- Designed for various simple works (hammering, beating, straightening, etc.)
- Locksmith and sheet metal works
- Assembly of parts of machines and devices
