

MN-26-020 Cable cutters

Cable cutter for precise cutting of thick cables

Features & benefits

- Two-stage ratchet mechanism allows you to cut cables of different diameters and retract the movable blade at every stage of the work
- The optimal gear ratio allows to minimize the force needed to cut the cable
- Cutting without crushing and deforming the cables thanks to precisely finished hardened blades with a hardness of 54-56 HRC
- Special handles on the handle allow the pliers to be supported while cutting
- Clean and smooth cutting of thick cables with a maximum diameter of 32 mm or a cross-section of 325 mm² thanks to the ratchet guide of the blade

Applications

- Application during electrical installation works
- For cutting aluminum and copper single and multi-core cables

Users

- Electricians
- Fitters
- DIY enthusiasts
- Mechanics
