

MN-63-05 Insulated knives for electricians

Professional knives for electricians

Features & benefits

- The fully insulated blade protects the user from electric shock
- The profiled two-component handle provides a comfortable grip and knife operation
- The protective hood for the blade protects them against damage during transport and protects the user against injury
- Certified VDE insulation confirms that the knives have been tested in a laboratory accredited by the German VDE testing institute and meet the requirements of EN 60900: 2018
- The precision-made stainless steel blades enable low-power cutting
- Improved ergonomics thanks to the handle with a comfortable collar to prevent the hand from slipping
- The hook foot at the end of the hook blade allows the wires to be stripped from the outer sheath without damaging the wires
- The additional front blade allows the cables to be cut in two directions

Applications

- The Knives for stripping copper and aluminum cables, single and multi-core - with rubber and PVC insulation

Users

- Electricians
- Fitters
- Mechanics
- DIY enthusiasts
