

MN-20-184 Crimping pliers for end sleeves 0.25-6mm² 175mm CRMO TPR

Handy automatic press

Features & benefits

- Adjusting the size of the dies and the clamping force - turning the knob in the "+" direction increases the die, while in the "-" direction reduces the die
- The profiled two-component handle provides a comfortable grip and work comfort
- The locking ratchet system supports the crimping and allows the pliers to be opened only after the terminal is crimped or the lock is released
- The jaws for crimping insulated and non-insulated terminals, single and double, in the range of 0.25-6 mm² (24-10 AWG)
- The jaws made of high-quality, hardened steel guarantee durability and quick and effective crimping of the sleeves
- The self-adjusting jaw system allows for accurate compression of the sleeve, while eliminating crimping errors resulting from selecting the wrong die size

Applications

- Application during electrical installation works
- For crimping end sleeves on cables

Users

- Electricians
- Fitters
- Mechanics
- DIY enthusiasts
