

RAWLPLUG MULTI-PURPOSE DRILL BIT

Product information

Features and benefits

- Specially sharpened carbide plate with 118° angle and centring point allows for quick and cylindrical drilling
- Very deep seating of carbide plate significantly improves connection with the drill core, which affects quality
- The L-shaped flute ensures proper extraction of the dust from any material
- Heat treated, which increases the hardness of the steel to 52 HRC for optimal resistance during operation

Applications

- Suitable for operation with impact drill and cordless drill

Base materials

- Concrete
- Solid Brick
- Lightweight Concrete Block
- Timber
- Structural Steel
- Tile
