

RPS-PVC-W Hand Held Polyurethane Foam for PVC - Winter version

Super low-pressure (with "low-expansion" formula), one-component polyurethane foam with delivery tube - Winter version.

Product information

Applications

- Fixing pipes and cables in HVAC systems
- The application of PU foam: installation of windows and doors, filling, sealing, insulation in the construction industry
- · Installation of windows and door
- Easy fixing of door and window frames timber, metal or PVC
- · Fixing (for installation of doors and windows)
- Precise filling and sealing in the wide range of sizes gaps
- Thermal insulation of plumbing and central heating
- · Installation & sealing of window sills
- Thermal insulation of roofing (including flat roofs)
- Filling gaps in the thermal insulation of buildings
- Filling frame structures

Features and benefits

- Low Expansion formulation (low growth) enables applications to narrow gaps, guarantees high yield (no wastes) and eliminates the risk of frame deformation
- Low-pressure formulation eliminates risk of frames deformation and ensures proper gaps filling
- Ideal for mounting, sealing and soundproofing, particularly for PVC profiles susceptible to deformation.
- Excellent sound and thermal insulation properties.
- Cutting time 40 min after apllication
- Excellent adhesion to most materials and substrates used in construction.
- · Resistant to mould and fungi.
- Prolongs the construction season possible work at low temperatures

Installation guide

- 1. Wear protective gloves. Ensure surfaces are free from dust, dirt or debris.
- 2. Remove the frost from the working surface.
- 3. Before using, make sure that the can temperature is above zero (optimum +20°C). Application temperature from -10°C up to +30°C.
- 4. Shake can vigorously for 30 seconds to mix properly components.
- 5. Screw straw-applicator onto the can. Hold can upside-down during application.
- 6. Fill gaps from down to up, zigzag motion, alternating from one wall to the other. Fill gaps to approximately 60 % volume. Max. wide of the gap 5 cm. Gaps wider than 5 cm should be applied after hardening of the previous layer.
- After full curing, cut the excess foam with a knife and protect it from UV exposure by coating with plaster, paint, acrylic or silicone.

Technical Data

Parameter		Value	Methods		
Application temperature	[°C]	-10 ÷ +30			
Can temperature	[°C]	+20			
Efficiency	[dm³]	max. 45			
Colour	-	Light yellow			
Post-expansion	[%]	160			
Skin formation time	[min]	8 ÷ 12	20°C, RH 90%		
Pretreatment time	[min]	45	20°C, RH 90%		
Complete hardening time	[h]	24			
Fire resistance class	-	В3	DIN 4102		
Density	[kg/m³]	26 ± 10	PN-EN ISO 845:2000		
Dimensional stability	[%]	≤5	40°C, RH 95%, 24 hrs		
Water absorption after 24h	[kg/m³]	≤2	PN-EN 1609:1999		
Tensile strength	[kPa]	≥ 100	PN-EN 1607:1999		
Compressive strength	[kPa]	≥ 50	PN-EN 826:1998		
Thermal resistance (upon hardening)	[°C]	-50 ÷ +90			
Thermal conductivity	[W/mK]	0,036			
Preparations solublity	-	Acetone, before hardening	Cleaner RPC-0500		
Soundproofing coefficient	[dB]	61	EN 12354-3		
Volume	[ml]	750			

Parameter		Value			
Shelf life [month]		18			
		upright position in an originally closed container			
	-	the storage temperature: from +5°C to +35°C (room temperature is recommended)			
Storage conditions		dry, cool and well-ventilated place away from direct sunlight and other sources of heat and ignition			
		storing the product in conditions other than recommended may shorten the life time even by 3 months $$
