

MN-20-14 Side cutting pliers with articulated joint

Side-cutting pliers with articulated joint, made of CR-V steel with non-slip handle

Features & benefits

- High quality chrome-vanadium steel enables long service life of the tool
- A resistant rubber handle with an anti-slip coating provides a secure grip
- Additionally, inductively hardened blades to provide proper hardness (56-62 HRC)
- Thanks to a specialised mechanism with articulated joint, pliers have bigger cutting force than traditional cutters

Applications

- Intended for construction and assembly works, e.g. cutting wires

Users

- Electricians
- Fitters
- DIY enthusiasts
- Mechanics
