

MN-30-40 Locksmith's hammers

Locksmith's hammers with round wedge and handle guard

Features & benefits

- Hard and flexible handle is made of ash wood, thanks to a varnished coating, it protects it against atmospheric conditions
- Hammer head is made of forged steel, inductively hardened, which provides its durability
- Hammer handle is additionally protected with a metal cover by a hammer head which protects it from a physical damage
- Round, sleeve-shaped wedge enables a secure connection between the handle and head
- Non-slip, rough cover of the handle prevents from slipping out the hammer from a hand

Applications

- Intended for all types of easy works (sticking, tapping, straightening out etc.)

Users

- Joiners
- Roofers
- Road workers
- Gypsum plasterers
- Tilers
