

MN-32-11 Stoning hammer

Stoning hammer with handle made of beech wood and round wedge

Features & benefits

- Additionally, the hammer handle is varnished and made of beech wood, which protects the hammer against weather conditions
- Hammer handle is secured with rubber near the hammer head, which protects the handle from physical damage
- Round, sleeve-shaped wedge enables a secure connection between the handle and head
- Double-sided hardened hammer head 55HRC and a square section is durable and comfortable
- Well balanced, which enables light and strong strikes

Applications

- Intended for tapping, cracking and other construction works (after the rubber pad is fitted, e.g. paving stone, tiles, kerbs etc. may be tapped)

Users

- Road workers
- Fitters
- Masons
- DIY enthusiasts
