

MN-53-0 Adjustable wrenches

Adjustable wrench (Swedish type) of forged steel with rubberized handle

Features & benefits

- The key made of forged steel, inductively hardened jaws, which translates into durability of the tool
- Satin coating is used to protect metal elements of the wrench from corrosion
- Polished jaws with a scale facilitate precise adjustment of the wrench
- The handle coated with rubberized plastic increases firmness of grip

Applications

- Adjustable wrench (SWEDISH type) is a universal tool for loosening (tightening) all kinds of screws and nuts

Users

- DIY enthusiasts
- Plumbers
- Fitters
- Mechanics
