# MN-83-15 Aluminum adjustable squares

## Aluminum bevel protractors with lock for angle setting

## Features & benefits

- Body made of aluminum is light and durable
- Millimetre pitch on steel rule is marked using black colour and therefore it is well visible and may be read off easily
- Precise angle scale enables setting exact angle
- Angle setting lock facilitates measurements

## Applications

- Intended for making measurements, marking in joinery, fitting and building works

## Users

- Joiners
- Roofers
- Carpenters
- Locksmiths
- DIY enthusiasts
