

MN-71-1 Floating rules with 2 vials profi

Aluminum floating rules with reinforced profile 90 mm, vertical and horizontal vial

Features & benefits

- Aluminum profile guarantees corrosion resistance
- Two accurate vertical and horizontal vials with an accuracy of 1 mm/m provide measurement accuracy
- Diced profile assures ideal straightness along the entire length of the tool
- Reinforced aluminum profile with two vertical and horizontal vials makes it both a floating rule and a level
- Internal reinforcement of the entire floating rule assures the stiffness of the rule

Applications

- Professional floating rule used for levelling and evening mortars on large surfaces

Users

- Roofers
- DIY enthusiasts
- Bricklayers
- Road workers
- Tilers
