

MN-66-800 Plane for processing of drywall edges

Plane for processing drywall, 130x60x240 mm with two cutting blades

Features & benefits

- Simultaneous milling of the board by two blades allows you to make a perfect edge at an angle of 45 degrees, which is needed when connecting wallboards
- Use of two blades makes it possible to make smooth edges when processing wallboards
- Universal gradual blade adjusting allows you to edge wallboards from 9 to 15 mm
- Ergonomic shape of the body increases work comfort

Applications

- Intended for finishing the edges of drywalls in order to connect two drywall edges

Users

- Gypsum plasterers
- DIY enthusiasts
- Tilers
