

MN-95-005 Dirty water pump 750 W

Dirty water pump 750 W with water connection

Certificates (icon):

Features & benefits

- Submersible pump allows collection, pumping out or pumping of wastewater with solids up to 35 mm in size
- A 750 W motor and reinforced structure allow the water to be pumped effectively from a depth of up to 8 meters
- High efficiency of the pump ensures higher water pressure which, among others, means that work can be finished sooner
- Water connection allows hoses of various diameters to be connected
- **Red Plug Service** guarantees quick repair of a broken tool though free courier shipment from and to the customer

Applications

- Intended for pumping clean and dirty water, as well as sewage (max. size of impurities up to 35 mm)
- Suitable for total immersion

Equipment

- Water connection

Users

- Plumbers
- Gardeners
- DIY enthusiasts
- Road workers

Technical properties

Index	Power	Box	Outer	Box weight	Outer weight	EAN
	[W]	[pcs]	[pcs]	[kg]	[kg]	
MN-95-005	750	1	4	5.7	22.7	5906757909564

power	750 W
immersion depth	max. 8 m
head	max. 9 m
size of impurities in water	max. 35 mm
water temperature	max. 35 °C
max. efficiency	13 000 L/h
cord length	10 m

Warnings

- Always use eye protection
- Read user manual
- USER'S MANUAL. Always follow safety instructions contained in the user's manual and applicable health and safety at work regulations. The failure to comply with warnings and recommendations contained therein may result in electric shock, fire, serious injuries and even death. Read and understand the user's manual carefully and keep it for future reference
- The maximum amount of water pumped can only be achieved by using hoses with the largest possible diameters. If hoses with a smaller diameter are used, this value will decrease. In case of using a universal connection, shorten it to the size of the hose being used so as not to limit the pump performance.
