

MN-19-010 Bit holder with stop ring and depth adjustment

Universal, steel bit shank with magnet and depth adjustment

Features & benefits

- Shank 1/4" allows you to use them with the majority of drills and drill-drivers available on the market.
- Steel cover increases damage resistance
- Strong internal magnet fastens bits and screws properly during work
- Special stop ring allows you to tighten screws evenly with the ground
- Depth adjustment of screwing allows you to tighten screws at any depth including facing

Applications

- Intended for use with a cordless drill and driver
- For holding bits during screwing in the screws

Users

- DIY enthusiasts
- Roofers
- Fitters
- Engineers
- Bricklayers
