

RT-TDC Drill bits Roof System with collar

Special tapered drill bits with limiter for flat roof fixings

Certificate

Product information

Features and benefits

- Centre point for quick commencement of drilling without the drill slipping
- 160° angle tip allows for quick drilling in concrete
- Very deep seating of carbide plate significantly improves connection with the drill core, which affects quality
- The conical connection between drill and an SDS plus adapter allows the transfer of 100% of impact
- Ring acting as a limiter allows drilling holes at a constant depth
- The cuts in the limiter facilitate drilling through insulation without winding up the insulation around the drill bit

Applications

- Drilling holes through insulation for facade and roofing mounting
- Suitable for operation with the RoofSystem adapter

Base materials

- Concrete
- Natural Stone (after site testing)
- Solid Brick

Corresponding products

- R-GOK Telescopic sleeve with round plate
