

RT-DDB Diamond discs Concrete Regular Diamond

Diamond discs for cutting concrete, brick, airbrick and other building materials

Certificate
EAC

Product information

Features and benefits

- Evenly distributed grains of diamond in the disc segments allows for lasting cutting parameters
- 12 mm high segment provides extra time for work
- High-quality connection between the segments and the disc increases the service life and the cutting efficiency
- Compensation grooves cool the discs allowing for work without cooling water
- The internal bore of 22,23 mm allows for use with all angle grinders available on the market

Applications

- Cutting of concrete, brick, airbrick and other building materials
- Suitable for operation with angle grinders

Base materials

- Concrete
- Solid Brick
- Solid Concrete Block
- Hollow Brick
