Installation guide

- 1. Clean up the gap. Surface, that the paste will be applied on, should be dry, clean, free of dust, dirt, grease, oil, rust, remains of old sealant and other substances that might lower the cohesion.
- 2. In case of absorptive substrates, the priming is suggested. The test of adhesion prior application is also recommended.
- 3. The product can be applied unterwater or during intensive rainfall.
- 4. Applied product may be smoothed with a spatula or similar tool. Moisten the spatula first in water solution of soap.
- 5. After completing the application, wipe tools with a paper towel and clean with solvent.
