

## RT-IBIT-HEX Hexagonal impact screwdriver bits

Impact screwdriver bits for tightening Hex screws, for a wide range of applications using impact drivers

### Product information

#### Features and benefits

- The hardness of 58-60 HRC allows overcoming the high torque and work with impact wrenches
- Special incisions allow better grip in the machine's holder without losing the tip
- Precisely milled bit head allows a better fit with the screw socket
- Special black anti-corrosion coating protects against rust
- Laser marking of the type of bit allows identifying the bit even after use
- Made in Germany to the highest DIN standards to ensure high quality and service life

#### Applications

- Tightening Hex screws, for a wide range of applications using impact wrenches

#### Corresponding products

- RT-IBIT-ADAP Impact bit holder
