

RT-IBIT-PH Phillips impact screwdriver bits

Impact screwdriver bits for tightening Phillips screws, for a wide range of applications using impact drivers

Product information

Features and benefits

- The hardness of 58-60 HRC allows overcoming the high torque and work with impact wrenches
- Special incisions allow better grip in the machine's holder without losing the tip
- Precisely milled bit head allows a better fit with the screw socket
- Special black anti-corrosion coating protects against rust
- Laser marking of the type of bit allows identifying the bit even after use
- Made in Germany to the highest DIN standards to ensure high quality and service life

Applications

- Tightening Phillips screws, for a wide range of applications using impact wrenches

Corresponding products

- RT-IBIT-ADAP Impact bit holder
