

SP-KSC plastic collated pins

Nails on plastic for steel and concrete, designed together with powder nail guns for heavy construction applications

Certificate

Product information

Features and benefits

- Ballistic point increases performance into the base material. This special design is responsible for providing best load bearing values for this type of fixing
- Smooth shank for low penetration resistance
- Plastic collation provides protection from deterioration by weather conditions or high humidity
- Compatible with leading manufacturers tools currently on the market

Applications

- Electrical cable and pipe clamps
- Fixing pipes and cables in HVAC systems
- Formwork installation
- Installation of temporary handrails and balustrading

Base materials

- Concrete C20/25-C50/60
- Reinforced concrete
- Concrete Slab
- Unreinforced concrete
- Solid Concrete Block
