

## [Spanish]: RT-DDW Diamond disc for fresh concrete cutting

[Spanish]: Diamond disc for fast cutting of wet and fresh concrete

### Certificados

### Información del producto

#### Características y ventajas

- [Spanish]: Characteristic arrangement of diamond segments along with 4 vertical segments enables cutting fresh concrete without damaging the segments and wedging in the material
- La combinación de segmentos láser de alta calidad con el disco aumenta la vida útil y la eficiencia del corte.
- [Spanish]: Special, patented process of connecting segments with a disc core, reduce vibrations, increasing safety and work efficiency
- [Spanish]: Special segment shape enables cutting wet concrete

#### Aplicación

- [Spanish]: Segmented diamond disc, with additional vertical segments for cutting wet concrete
- [Spanish]: Adapted to work with stationary cutters manual and wheel petrol cutters (7,5 kW)

#### Material de sustrato

- Hormigón fresco

## Especificaciones logísticas
