

[Lithuanian]: MN-20-187 Crimping pliers

[Lithuanian]: Precise automatic press

[Lithuanian]: Features & benefits

- [Lithuanian]: Adjusting the size of the dies and the clamping force - turning the knob in the "+" direction enlarges the die, while in the "-" direction reduces the die
- [Lithuanian]: The elongated two-component handle provides a comfortable grip, work comfort and increases the clamping force
- [Lithuanian]: The locking ratchet system supports the crimping and allows the pliers to be opened only after the connector is crimped or the lock is released
- [Lithuanian]: The color code of the jaws facilitates the selection of a socket adapted to the diameter of the connector in the range of 0.5 - 6 mm² (22-10AWG)
- [Lithuanian]: The jaws made of high-quality hardened steel guarantee durability and quick and effective crimping of the sleeves
- [Lithuanian]: The modified lever mechanism allows the use of less force compared to classic tools

[Lithuanian]: Applications

- [Lithuanian]: Application during electrical installation works
- [Lithuanian]: For crimping connector terminals on cables

[Lithuanian]: Users

- Elektrikai
- Montuotojai
- Mechanikai
- DIY entuziastai

[Lithuanian]: Technical properties
